## Projects

### 2023 AGRIFARM [GITHUB]

JS, HTML, CSS, PHP

A PHP and MYSQL based website which is made to promote and help farmers by blog,news,weatherapp and on the same time providing consumers with a platform to buy organic groceries.It has two interfaces - 1.Ecommerce for consumers, 2.Agrifarm for farmers.I have used mysql as my backend and UI/UX is also very attractive.In this app i have also desinged an admin panel to regulate the flow of website.

### 2023 CHATAPP [GITHUB]

JS, HTML, CSS, PHP, AJAX

A dynamic and interactive chat web application that i personally developed using PHP.It has various features like real time messaging,User authentication,message histroy,responsive desing.This project highlight my techical skills but also highlights my ability to create a user-centric web application that enchances communication.

### 2023 MINIPRO [GITHUB]

JS, HTML, CSS, REACT.JS, THREE.JS

A dynamic,interactive and innovative web application that seamlessly blends the power of REACT.JS with THREE.JS to create a visually stunning and interactive 3D experience.It has various features like 3D visualization, react integration, interactive elements.Overall it is a react app that leverages Three.js to bring 3D elemetns to life.

## Achievements
